
Roll-Over Switch for Auxiliary Heating

Topic number	LI83.70-N-036226
Version	1
Design group	83.70 Stationary heater, auxiliary heater
Date	09-27-2005
Validity	Sprinter MY05, 3500 series with auxiliary heating H12 / HDB or HZ9 / 3JV
Reason for change	

Complaint:

Auxiliary heating is inoperative

Cause:

The auxiliary heating has a fuel pump, which is equipped with a roll-over switch. If the power supply is interrupted for less than 20 seconds, the roll over switch will cut off the power supply beyond that interruption.

Remedy:

Interrupt the power supply for instance at the battery for more than 20 seconds, and the roll over switch will be reset.

Symptoms
Body / Air conditioning / Heater / Insufficient heat output
